Numbers may not add due to rounding.
- 3) Corresponds to process plant feed at both Mount Milligan and Öksüt.
- 4) Changes in mineral reserves or mineral resources, as applicable, are attributed to: (i) changes to metal price and foreign exchange assumptions, (ii) information provided by drilling and subsequent reinterpretation and reclassification of mineral resources, and (iii) changes to cost estimates and metallurgical recoveries.
- 5) Öksüt open pit mineral reserves and mineral resources include the Keltepe and Guneytepe deposits.
- 6) Inferred mineral resources have a great amount of uncertainty as to their existence and as to whether they can be mined economically. It cannot be assumed that all or part of the inferred mineral resources will ever be converted to a higher category.

Additional Footnotes for Tables 1, 2, 3

General

- A conversion factor of 31.1035 grams per troy ounce of gold is used in the mineral reserve and mineral resource estimates.

Mount Milligan

- The mineral reserves have been estimated based on a gold price of \$1,350 per ounce, copper price of \$3.00 per pound and an exchange rate of 1USD:1.30CAD.
- The open pit mineral reserves are estimated based on an NSR cut-off of \$7.35 per tonne (C\$9.55 per tonne) and takes into consideration metallurgical recoveries, concentrate grades, transportation costs, smelter treatment charges and royalty and streaming arrangements in determining economic viability.
- The mineral resources have been estimated based on a gold price of \$1,550 per ounce, copper price of \$3.50 per pound and an exchange rate of 1USD:1.30CAD.
- The open pit mineral resources are constrained by a pit shell and are estimated based on a copper equivalent basis which was equivalent to NSR cut-off of \$7.35 per tonne (C\$9.55 per tonne) and takes into consideration metallurgical recoveries, concentrate grades, transportation costs, smelter treatment charges and royalty and streaming arrangements in determining economic viability.
