

News from Endako Mine

With the hunting season underway, Endako Mine would like to remind everyone that access in and around the mine site is restricted. For the safety of yourself and others, please obey signs, respect barriers surrounding site, and stay a safe distance away from property boundaries.

Currently onsite preparations are being made to prepare the site for winter. With temperatures dropping in recent weeks, the site is currently blanketed in a light cover of snow. Although dust suppression activities have ceased for the time being, Endako Mine is pleased with the progress made with the summer and fall seed and fertilizing program. The program was a success and will go a long way in mitigating and controlling dust in the coming year.

As always, if there are any questions with regards to the mine, please contact Greg Herbert or Kosta Sainis at 250.699.6211 at extension 386 and 340 respectively.

Endako Mine 2016. Growth within tailings facility from summer/fall seed and fertilizing program.
